

Restaurant Table Booking & Pre-Ordering App

JIRA EXECUTION

Name: SHIVANAND

SRN: PES2UG24CS473

Section: H

1.Created a dashboard for space:

2.Epics created :

3. Backlog with Epics and User Stories:

4. Adding story points:

The screenshot shows the Jira interface for a space named "Restaurant Table Booking & Pre-Ordering App-PES2UG24CS473". The "RES board" is selected, and the "Backlog" tab is active. A search bar for the backlog is present. Below the search bar, there are filters for "Version", "Epic", and "Quick filters". The backlog list contains several items, including "RES-4 View Live Floor Plan", "RES-5 Reserve a Table", "RES-6 Cancel Reservation", "RES-7 Pre-Order Menu Items", "RES-8 Queue Kitchen Prep Ticket", and "RES-9 Update Table Status". The "RES-5 Reserve a Table" item is highlighted, and its "Story Points" field is being edited, showing the value "5".

Item ID	Item Name	Category	Status	Story Points
RES-4	View Live Floor Plan	Table Reservation ...	To Do	
RES-5	Reserve a Table	Table Reservation ...	To Do	5
RES-6	Cancel Reservation	Table Reservation ...	To Do	
RES-7	Pre-Order Menu Items	Pre-Ordering & Kit...	To Do	
RES-8	Queue Kitchen Prep Ticket	Pre-Ordering & Kit...	To Do	
RES-9	Update Table Status	Table Status Mana...	To Do	

5. Backlog with Epics and User Stories After Adding story points:

The screenshot shows the Jira interface for the same space as before. The "RES board" is selected, and the "Backlog" tab is active. The backlog list now includes a new item "RES-7 Pre-Order Menu Items" with 5 story points. The "RES-5 Reserve a Table" item is still highlighted, and its "Story Points" field is being edited, showing the value "5".

Item ID	Item Name	Category	Status	Story Points
RES-4	View Live Floor Plan	Table Reservation ...	To Do	3
RES-5	Reserve a Table	Table Reservation ...	To Do	5
RES-6	Cancel Reservation	Table Reservation ...	To Do	2
RES-7	Pre-Order Menu Items	Pre-Ordering & Kit...	To Do	5
RES-8	Queue Kitchen Prep	Pre-Ordering & Kit...	To Do	8
RES-9	Update Table Status	Table Status Mana...	To Do	3

6.Added stories to RES sprint 1:

The screenshot shows the Jira interface for the 'Restaurant Table Booking & Pre-Ordering App-PES2UG24CS473' space. The 'RES board' is selected, and the 'Backlog' view is active. The 'RES Sprint 1' is visible, containing four work items:

Item	Summary	Status	Priority	Assignee
RES-4	View Live Floor Plan	To Do	3	Assignee
RES-5	Reserve a Table	To Do	5	Assignee
RES-6	Cancel Reservation	To Do	2	Assignee
RES-9	Update Table Status	To Do	3	Assignee

A context menu is open at the bottom, showing options: '4 selected', 'Select all', 'Edit fields', 'Change status', 'Watch options', 'Delete', and 'Estimate: 13'.

7.started RES sprint1:

The screenshot shows the Jira interface for the 'Restaurant Table Booking & Pre-Ordering App-PES2UG24CS473' space. The 'RES board' is selected, and the 'Active sprints' view is active. The 'RES Sprint 1' is visible, containing four work items:

Item	Summary	Status	Priority	Assignee
RES-6	Cancel Reservation	To Do	2	Assignee
RES-9	Update Table Status	To Do	3	Assignee

The 'TO DO' column shows 4 items. The 'IN PROGRESS' and 'DONE' columns are empty.

8.Active RES Sprint 1 board:

9.Completed Sprint 1:

10.Added remaining stories to the RES Sprint2:

The screenshot shows the Jira interface for the 'RES board' in the 'Restaurant Table Booking & Pre-Ordering App-PES2UG24CS473' space. The 'Backlog' tab is selected, displaying a list of work items for 'RES Sprint 2' (3 Sep - 10 Sep, 4 work items). The items are:

Item	Status	Priority	Assignee
RES-6 Cancel Reservation	In Progress	2	[User]
RES-9 Update Table Status	To Do	3	[User]
RES-7 Pre-Order Menu Items	To Do	5	[User]
RES-8 Queue Kitchen Prep Ticket	To Do	8	[User]

Below the sprint items is a 'Backlog' section with 0 work items. The interface includes a search bar, filters, and a 'Start sprint' button.

11.Active RES Sprint 2 Board:

The screenshot shows the Jira interface for the 'RES board' in the 'Restaurant Table Booking & Pre-Ordering App-PES2UG24CS473' space. The 'Active sprints' tab is selected, displaying a Kanban board for 'RES Sprint 2' (3 Sep - 10 Sep, 4 work items). The board is organized into columns: 'TO DO' (1 item), 'IN PROGRESS' (1 item), and 'DONE' (2 items). The items are:

Column	Item	Status	Priority	Assignee
TO DO	Queue Kitchen Prep Ticket	To Do	8	[User]
IN PROGRESS	Pre-Order Menu Items	In Progress	5	[User]
DONE	Cancel Reservation	Done	2	[User]
DONE	Update Table Status	Done	3	[User]

The board includes a search bar, filters, and a 'Complete sprint' button. The 'Queue Kitchen Prep Ticket' item is in the 'TO DO' column, 'Pre-Order Menu Items' is in the 'IN PROGRESS' column, and 'Cancel Reservation' and 'Update Table Status' are in the 'DONE' column.

12.Completed RES Sprint 2 :

13.Burndown Chart of RES Sprint 1:

14. Burndown Chart of RES Sprint 2:

Reflection Questions:

1. Did your estimations reflect the actual effort?

Honestly, it's hard to say for sure since I did this solo and didn't track real hours — I just went with gut feeling on complexity. Story points felt roughly right though. Something like cancelling a reservation is clearly simpler than building offline ticket-caching for the kitchen, so an 8 vs a 2 made sense to me.

2. Was your backlog well-prioritized?

Yeah, I think so. I kept the reservation and floor-plan basics as High priority since those are the core things a diner actually needs to book a table, and pushed pre-ordering and cancellation to Medium since they're more like add-ons. That matched the priorities I'd already set in Lab 1.

3. How did your simulated sprint align with your plan?

Not perfectly, which is kind of the point. I planned for 4 stories in Sprint 1 but only finished 2 by the end, with one still in progress and one not even started. That's pretty realistic actually — teams often plan more than they can finish, so this gave me a small taste of that.

4. What insights did the burndown chart give about your team's capacity?

The chart showed I was falling behind the ideal pace line, meaning I'd committed to more story points than I could realistically knock out in the sprint. If this were a real team, the takeaway would be to either commit to less next time or break the bigger stories down into smaller chunks so progress is more predictable.
